

# Co-organizing events at the nZEB training center

WE ARE THE FIRST TO OFFER THE POSSIBILITY OF CALCULATING THE CARBON FOOTPRINT OF A HELD WORKSHOP

The Energy Institute Hrvoje Požar provides excellent conditions for hosting educational sessions, seminars, and workshops in a modern space that meets the nZEB standard (nearly zero-energy building).

Located on the ground floor of the Institute, the training center includes two rooms – Siniša and Filip – which can be used separately or combined into a larger space for bigger groups. The Institute building utilizes energy from its PV system on the roof and is equipped with energy-efficient heating, cooling, and lighting systems. The advanced management and automation system optimizes the room conditions based on occupancy and comfort parameters such as temperature, CO<sub>2</sub> concentration, and humidity.

Our educational center is the perfect venue for hosting business events in a comfortable, technologically advanced, and environmentally sustainable setting.

---

## EIHP can co-organize workshops at the following rates:

	4 hours (half day)	8 hours (full day)
